

Business Driven Technology Solutions

The Cram Group offers a range of hosted solutions based on experience with the way our customers manage business. These enable us to be part of the customers team through traditional service levels as well as transparency. Our solutions are categorized into 3 groups and a listing of the products we support. Please visit our website or call us for additional information.

Consumption based hosting services divided by infrastructure, platform, software, and resources. Mix and

match components, turn them on or off, and have complete transparency into your solution costs, utilization & performance.

Familiar Microsoft Office collaboration and productivity tools extended with support for

collaborative AEC Industry processes and integrations with cloud based technologies from vendors like Meridian Systems, Oracle Primavera & Sage.

Our traditional license based service bundled with industry proven user support. These services enable you to streamline

the management of information in a structured, web based environment and leverage critical desktop integrations.

Products

We work with Vendors of trusted applications you know by name. We believe in working with industry proven products

that have an affordable entry price, sustainable cost of ownership, and open architecture leaving the choice in your hands.
