TCG Receives Request

One of our service staff will coordinate you with a specialist that can answer questions related to software development options.

Finalize Specifications

If Required, a consultant will assist with any clarifications including layout or technology options and sample data we will require.

Send Quote to Client

In most cases we will provide a lump sum quote along with a mock up of the project. For complex projects, a prototype may be created

Signed Quote Received

Upon receipt of the signed quote and final specifications we will begin work.

Project Creation

Our development team will create your project using best practices from 10+ years of development services experience.

Testing & Quality Control

A separate team will perform quality control to ensure conformance to the requirements.

Project Delivery

We deliver the project and be available for review or any final clarifications.

Client Acceptance

We request a final signoff in order to close the version for future reference and payment.

Our Development Services team manages each step of the software development process to ensure a streamlined experience. You will have a single point of contact from beginning to end.

Based on years of programming experience and developer network relationships, we have developed a mature process including work control numbers and collaborative process management.
